

# Free Northern California Climate Engineering Awareness Event

On Saturday, July 28th, 2018, a critical public awareness event has been scheduled at the Shasta County Fairgrounds in Anderson, California. The event will be in the Fusaro Hall which has seating for approximately 800. Verifiable evidence will be presented to the public on the ongoing global climate engineering / geoengineering programs that are wreaking havoc on the atmosphere, environment, and human health. This is a FREE public education event organized and funded by GeoengineeringWatch.org and GEM FAIRE Inc. There is no admission fee and free informational materials (including commercial DVDs and 20 page booklets) will be handed out at the event. Those attending the Geoengineering Watch event need only to state so at the Shasta County Fairgrounds entrance in order to gain free entry. Doors to the Fusaro Hall will open to the public at 3 p.m. on Saturday, July, 28th. Numerous experts include former state and federal government biologists, an EPA whistleblower, and a former commercial airline pilot. All experts will present data that conclusively proves ongoing climate engineering programs are:

- Obscuring otherwise blue skies all over the globe
- Contributing to global ecosystem and species die-off
- Completely disrupting the hydrological cycle (rain cycle) all over the planet
- Destroying the ozone layer which is causing off the chart levels of UV radiation
- Contaminating our air, soils, and waters with highly toxic heavy metals
- Causing extreme and unquantifiable environmental and human health impacts
- Are being carried out illegally under the guise of "national security"

For over 65 years those in power have waged covert weather warfare against unsuspecting and innocent populations all over the planet while also attempting to mask the true severity of unfolding and accelerating climate collapse (which climate engineering is making worse overall). The ongoing covert climate engineering programs are referred to under several primary scientific terms: solar radiation management (SRM), stratospheric aerosol geoengineering (SAG), and stratospheric aerosol injection (SAI). The destruction already inflicted to the biosphere and all life forms from the climate modification insanity is immense, beyond quantification, and is accelerating by the day. Earth's weather and life support systems have long since been completely derailed and disrupted by global climate intervention operations. The highly toxic heavy metal and chemical fallout from these covert programs has contaminated the entire surface of the planet and every breath we take.

Questions that will be addressed by the experts at the event are:

- What is climate engineering / geoengineering / solar radiation management?
- Why are these operations being carried out?
- Who is behind these operations? Which counties and governments are involved?
- What are the overall consequences of the ongoing climate engineering operations? To the biosphere and to us?
- What are the geopolitical / global conflict ramifications as a direct result of climate engineering / weather warfare?
- How can we expose and stop these lethal programs?

Experts in attendance will present PowerPoint data and statements of urgency addressing the dire climate engineering issue.

**THE SPEAKERS AND EVENT SCHEDULE IS ON THE BACK OF THIS FLYER**

For questions please contact [admin@geoengineeringwatch.org](mailto:admin@geoengineeringwatch.org)

## The schedule for the Saturday, July 28th, 2018, event is as follows:

• **From 5 p.m. to 6 p.m.**, Dane Wigington, lead researcher for GeoengineeringWatch.org will conduct a PowerPoint presentation, titled "**Hacking The Planet: Climate Engineering And Climate Collapse**". This presentation will provide up to the minute front-line data to highlight the dire impacts of the ongoing climate engineering operations and the threat climate engineering / geoengineering poses to our survival and to the entire web of life. The ongoing legal efforts to expose and stop geoengineering will also be covered along with specific suggestions as to how each of us can help to turn the tide. GeoengineeringWatch.org, the largest and most visited climate engineering website / data archive in the world (over 30,000,000 visitors and counting).

• **From 6:30 p.m. to 6:50 p.m.**, Former Federal EPA scientist, Michael Davis, will present his research and testimony regarding his attempt to bring the climate engineering contamination to light within the ranks of the EPA. He was subsequently fired from the EPA as a consequence of his efforts to tell the truth.

• **From 6:55 to 7:20**, Former US military weather observer / former California Department of Fish and Game biologist, Allan Buckmann, will present research data to confirm the climate engineering reality and its impact on the environment.

• **From 7:25 to 7:45**, Former commercial airline pilot, Jeff Nelson, will confirm the climate engineering reality and will share his perspectives on the issue as a former commercial airline pilot.

• **From 7:45 to 8:05**, Former US Forest Service Biologist Francis Mangels will present research and testimony to confirm the climate engineering reality and its impact on the environment in Northern California.

### Extended Question And Answer Session With The Experts

• **From 8:05 p.m. to 9:30 p.m.**, an extended public question and answer session will begin with all 5 event speakers participating on the panel of experts. The speakers will try to reply to all questions posed with quick and concise answers in order to provide the maximum amount of critically important information during this Q and A session.

• A very high ranking US Air Force officer may also be attending the event, but we are not at liberty to disclose any more information about this individual at this time.

### Meeting The Experts

• **9:30 p.m.**: The Q and A discussion with the panel of experts will officially end, although those attending the event are welcomed to remain until **11p.m.** in order to speak to any or all of the event speakers / experts personally.

GeoengineeringWatch.org will also have an informational booth at the GEM FAIRE show in an adjacent building which will be open and stocked with free Geoengineering Watch materials during the full span of the GEM FAIRE event (also taking place at the Shasta County Fairgrounds from Friday, July 27th, through Sunday, July 29th). The Fusaro Hall where the GeoengineeringWatch.org event is taking place (adjacent to the GEM FAIRE event) will open at 3 p.m. on Saturday, July 28th. The Fusaro hall will have its own staffed and stocked Geoengineering Watch informational booth (in addition to the GeoengineeringWatch booth within the GEM FAIRE event building). Free Geoengineering Watch materials will be available at both booths. There are a variety of accommodations in the Redding / Anderson area, overnight camping (with services) is available at the Shasta County fairgrounds for a fee (contact the Shasta County Fairgrounds for further details). Our most sincere gratitude to GEM FAIRE Inc. for their help with making this event possible, and for their constant efforts to assist in the overall battle to expose and halt the ongoing climate engineering assault.

The planet's life support systems are unraveling by the day, this is not speculation, but verifiable front-line fact. Geoengineering Watch hopes that all those who are able to attend this free critical awareness event, will do so. It is our collective efforts that can yet make a difference for the better. Hope to see you at the July 28th, 2018, event.
